LIEN-YUN-CHIANG SEARCH AREA.

EIGURE 1.

	CIA IMAGERY ANALYSIS DIVISION	
		CIA/PIR-01049
SEARCH FOR CRUISE MISSILE SITES, LIEN-YUN-CHIANG, CHINA Collateral sources indicate that a coastal area in China may be used for missile testing. The coastal area, extending 5 nautical miles (nm) inland from 34-50N 119-12E (near Lien-Yun-Chiang, China) southeast to 34-15N 120-20E, including offshore islands (Figure 1), was searched for indications of missile-related activity with negative results. The entire search area may be negated on Frior to this date, only covered the northern half of the area, while covered the southern half with clear photography Two suspect cruise missile sites were previously reported in the area. Site "A", 1.6 mm northwest of Lien-Yun-Chiang at 34-45-55N 119-20-56E, is a coastal gun position. Site "B", 5.6 mm southeast of Lien-Yun-Chiang at 34-42-25N 119-28-35E, is an area of unidentified ground scarring adjacent to the road. The road pattern of an area at 34-43-30N 119-25-45E is suggestive of a radar or meterological station, however, no equipment can be identified. REFERENCES MAPS and CHARTE ACIC. US Air Target Chart, Series 200, Sheet 0386-8A, Scale 1:200,000, 1st edition, June 1959 (SECRET)
